Using PDFencryptDocument

The current documentation specifies incorrect values for the Permission parameter. The list below specifies the correct values that need to be specified.

Permission	Value	Description
Enable Printing	-64+4	The user will be able to print the document.
Enable document modification	-64+8	The user will be able to modify the document.
Enable copying text and graphics	-64+16	The user will be able to copy the content of the document.
Enable adding and changing notes	-64+32	The user will be able to add or modify document notes.
Disable all	-64	The user will only be able to view the document.
Enable all	-4	No restrictions.

To enable multiple options specify –64 plus the values 4, 8, 16, or 32. E.g. to enable both printing and adding notes –64 + 4 + 32 = -28.

Example:

```
;; enable printing and copying of text and graphics
PDFencryptDocument("C:\PDFWriter.pdf","MasterPassword","UserPassword",-64+4+16)
```
